DEREK "BOO" WHALLON

Derek "Boo" Whallon was born April 30, 1997. He was born with Hypoplastic Right Heart Syndrome, Coarctation of the Aorta and Transpositioning of the Great Wall Vessels. He had a total of 3 major heart surgeries by the time he was 2 years old. He seemed to be doing relatively well until 2007 when doctors discovered he had a condition known as Plastic Bronchitis. During the same time it was diagnosed with Pulmonary Arterial Hypertension (PAH). We were told several times at that point that Derek may not survive. As a result of these complications, Riley doctors have tried many new medicines. This has required several hospital trips, some short, some not so short. Now our only option is a heart transplant. At first, doctors believed that Boo would need a heart/lung transplant and we would have to go to a different hospital that specializes in double organ transplants. However, testing and new procedures have proven it possible to cure Boo with just a heart transplant. The hope is that the lungs will gradually clear up over time. Thank you.

Let's Ride!

All Cyclist Welcome!
