2<sup>nd</sup>, and 3<sup>rd</sup> places**

At only 2 years old, LeeLand Carter is the youngest child known to be diagnosed with both muscular dystrophy and muscular sclerosis. Muscular dystrophy is a group of disorders that involve muscle weakness and loss of muscle tissue that get worse over time. Muscular sclerosis is a debilitating neurological disease that interferes with the signals that the nerves send to the rest of the body.

LeeLand and his family are from Middletown, OH. He has been given a life expectancy of 3 years. LeeLand was not diagnosed at birth, but just weeks after. Due to this delay in diagnosis, the insurance company is considering this a "pre-existing condition". While he does have a wheelchair, he is in desperate need of a wheelchair that is fitted with a headrest and other upgrades - which insurance will not cover. The family also desperately needs a dependable vehicle that will allow for wheelchair access.

So, don't forget this smile...come join us for the fun! If you can't, you can still help by sending checks payable to LeeLand Carter to: Bikers for Forgotten Smiles, 3929 Soldiers Home West Carrollton Rd., Moraine, OH 45342. For information call (937) 859-1689.
